WATER TICKETS

OBJECTIVE:

To see how decisions affect our standard of living and our quality of life. This will help students realize how important it is to use water wisely.

MATERIALS NEEDED:

- Water Tickets 25 per student
- · Box to use for toll box to collect tickets

PROCEDURE:

- 1. Introduce the game to the students by listing several places the students use water in the school, like a drinking fountain, restroom, lunchroom, and sinks.
- 2. Provide students with 25 Water Tickets each and instruct them to write their name on all of their Water Tickets.
- 3. Every time students use water, they are to put a Water Ticket in the Toll Box. If a student uses heated water, it will cost two tickets, because both water and energy are being used. It also costs two tickets if a student wastes water unnecessarily. For example, letting the water run while washing hands or letting it run to get a colder drink.
- 4. Keep a record of how many tickets the students have left each day.

DISCUSSION:

- What would happen if there was a real water shortage in the community and families were only issued a certain number of Water Tickets?
- What if, after they used them, all of their water was shut off?
- · What would they do to adjust their use of water?
- What do people do for fresh water when rivers flood their communities, dams break, or city water is contaminated?
