

ENERGY VAMPIRE OR ENERGY VAMPIRE SLAYER?

An energy vampire is any device that uses energy and drains power even when it is turned off. These energy suckers can add about \$165 every year to your electricity bill!

How good are you at conserving energy at home? Write a 1 in each box for the activity that you do and a 0 for each activity that you do not do. If you do not have the device, write an X in the box. Add up your points and decide if you're an energy vampire or an energy vampire slayer!

When not in use, you:

Unplug your cable	Unplug your video console	Unplug the microwave
Unplug your cell phone charger	Unplug the coffee maker	Unplug the alarm clock
Unplug the TV	Unplug your computer	Unplug an electric toothbrush
Unplug a DVD player	Unplug the printer	Unplug a nightlight during the day

Conclusion:

1. Are you an energy vampire or an energy vampire slayer?

2. What is one way you can reduce energy vampires in your house?

3. Compare your results to the rest of your classmates. Are there more energy vampires or energy vampire slayers in your class?
