

Product Installation Instructions

Light-Emitting Diode (LED)

To complete installation you will need:

- LED light bulb (located in your kit)

Instructions

REMOVE OLD LIGHT BULB

1. First we must choose an incandescent light bulb you will remove and replace with your new LED. Look around your home and determine which light is used the most. This is the bulb you should replace.
2. Always use the lowest wattage bulb that still gives you the light you need.
3. Remove the old incandescent light bulb. **WARNING:** Bulb may be hot.
4. Dispose of the old bulb properly. **WARNING:** Light bulbs are made of thin glass and can cut you if they break.

INSTALL NEW LED

5. Carefully remove your new LED from the package. Install your new LED and turn it on!
